Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 Excerpt: . . . investigations in various industries which have also indicated substantial gains from the liberal employment of properly designed illumination. It is evident, however, that the imperative need of the art is for a far greater number A record of these tests was published in Electrical Review, Chicago, March 22, 1919. of exhaustive tests covering many industries, tests which not only establish the range over which illumination may be profitably increased for a given operation, but which are also carried to such a point of extremely high illumination that an actual decrease in economy is recorded, due to the increased production, if there is any, being insufficient to compensate for the p. dded cost of the light. All of these needs seem so simple and so obvious that you are inclined to ask why hasnt all this been taken care of long ago. The answer is that those interested in the subject of scientific illumination have been men trained in designing better iighting systems, and in improving the efficiency of our lighting units. It is only through their efforts that artificial lighting comparable with daylight has become available and at a reasonable price. These men very properly look to those skilled in the science of management to cooperate with them in solving the second part of the problem; that is, determining just what degree of illumination is desirable and profitable in a given industry. As Chairman of the Reciprocal Relations Committee of the Illuminating Engineering Society, I commend...
