Reviews

A superior quality ebook and also the font employed was fascinating to learn. It is rally exciting throgh reading time. I am effortlessly could get a pleasure of reading a created ebook. (Geovanny Gerlach)

SESSIONAL PAPERS OF THE PARLIAMENT OF THE DOMINION OF CANADA VOLUME 21, NO. 12

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 164 pages. Dimensions: 9.7in. x 7.4in. x 0.3in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 Excerpt: . . . was used, assuming it to be uniform during the twenty-four hours. part n 27 4- Signifies losing in above. --Signifies gaining in above. During 1885 and 1886 the chronometers were carried to the telegraph office for exchange of signals. This was objectionable for two reasons, one on account of the transport itself, although carefully done, the other, and greater, on account of the sudden changes in temperature; this latter applies to the latter part of the season when there was a fire in the telegraph office. In 1887, the present year, the wires were brought into the observatory and the trouble obviated. This necessitated having the chronometers electrically connected, for which chronometers Prods ham, 3537, and Dent, 2071, were not adapted. Unfortunately, the time was too limited (only four weeks) for having two breakcircuit chronometers satisfactorily prepared. W. B. Hadlock, of Boston, Mass, was entrusted with the work, and he furnished two chronometers, Hutton, 1190, and Hadlock, 4082. His trials for temperature were confined to one week with the following results: --Chronometer. 4082 1190 4082 1190 4082 1190 Computing the temperature constant , , the temperature of compensation Q and the rate r, at 0 by the general formula rrZ(G-6r we find for chronometer 4082 0 67-79, --0068, r2s-03 gaining and for chronometer 1190 067-92, Z---0043, rl-52 gaining. From the above results, derived from meagre data, we find that chronometer 4082 has its fastest running theoretically at 67 79 F. gaining 2-03 daily, and similarly chronometer 1190...
