Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 edition. Excerpt: . . . a quantity of air-slaked lime, flowers of sulphur and charcoal (pounded up into a powder). This was placed round the affected plants, and indeed on every inch of soil in the frames. If this fungus is carefully watched it will be seen that it spreads all over the surface of the soil, and in a very short time the whole of the plants will be affected. In my case the above remedy was thoroughly effectual, with one exception. This was in a frame where the soil had sunk some 10 inches or 12 inches from the glass, and it was necessary to dress this two or three Bromeliaceous plants. --I am asked by a reader from Manchester if these can be grown with Cattleyas and Odontoglossum. Most certainly, and without the slightest ill effects to either. I am not so sure about the temperature required for Odontoglossums suiting many Bromeliads, as they for the most part enjoy strong heat; but they will thrive admirably with Cattleyas, and if they are set up on the stands used for Cattleyas, it will add to their appearance. They should be made quite as much a speciality of as Orchids. I am sure anyone getting a collection of these together will reap as much pleasure from them as from Orchids, and more so, for the majority are exceedingly ornamental when not in flower. --W. H. G. *Boronia heterophylla*. --This is one of the most beautiful indoor plants in...
