Tillage Requirements. It is apparent from the textural characteristics of the Sassafras silt loam, from its level to gently undulating surface topography, and from the classes of crops best suited for production upon this soil that the equipment required for its most economical tillage will differ very materially from the equipment to be used upon such other Coastal Plain soils as the Norfolk fine sand or sandy loam, which are more easily worked and are not so universally planted to the general farm crops. The Sassafras silt loam should be plowed to a depth of 8 or 9 inches, and if the natural soil is not so deep as this the depth should be gradually increased from year to year. It would be practically impossible to secure such adequate tillage of the type with light weight...
