

Leaf Protein: And Its By-Products in Human and Animal Nutrition

Filesize: 2.37 MB

Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

Cambridge University Press. Paperback. Book Condition: New. Paperback. 224 pages. Dimensions: 9.1in. x 6.1in. x 0.7in. This is an extensively revised second edition of N. W. Piries much acclaimed earlier work, *Leaf Protein and Other Aspects of Fodder Fractionation* (Cambridge University Press 1978). The fibrous character and flavour of many leaf crops impede their use as green vegetables, and feeding them directly to animals is relatively inefficient. The advantages of separating a fraction for use as human food, and a residue for animal feeding, have gained recognition during the last ten years. In suitable climates, fractionating leafy material can yield more edible protein than other forms of agriculture. The book concludes with a discussion of the problems that arise when leaf protein is made and used in practice, and of the potential role of fodder fractionation in human and animal nutrition. This volume will be of practical importance to students and research workers in animal and human nutrition, agriculture and rural development, particularly those with an interest in developing countries. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
