I. - Contributions to Meteorology; being results derived from an examination of the observations of the United States Signal Service, and from other sources; by Elias Loomis, Professor of Natural Philosophy in Yale College. Seventeenth paper. With three plates. [Read before the National Academy of Sciences, Washington, April 18, 1882.] Relation of rain areas to areas of low pressure. In my seventh paper, I examined all those cases in which the total rain-fall at all the stations of the United States Signal Service amounted to at least eight inches in eight hours, during a period of fifteen months. As the tri-daily observations have since that time been published for twenty-two additional months (viz: from Dec. 1873, to Jan. 1875, inclusive, and from Jan. 1877, to Aug. 1877) I propose to extend the examination to these later observations. The following table exhibits ail the cases from Dec. 1873, to Jan. 1875, in which the total rain-fall at all the stations amounted to...
