

Conference on the Numerical Solution of Differential Equations

Filesize: 8.88 MB

Reviews

Here is the best publication i have got go through until now. It is actually writter in simple phrases and never hard to understand. I realized this publication from my dad and i suggested this ebook to find out.

(Lorena White)

CONFERENCE ON THE NUMERICAL SOLUTION OF DIFFERENTIAL EQUATIONS

To read **Conference on the Numerical Solution of Differential Equations** PDF, you should follow the button under and save the file or have access to other information that are in conjunction with CONFERENCE ON THE NUMERICAL SOLUTION OF DIFFERENTIAL EQUATIONS book.

Springer Jan 1969, 1969. Taschenbuch. Book Condition: Neu. 235x155x15 mm. This item is printed on demand - Print on Demand Titel. Neuware - Generalisation of an inclusion theorem of L.COLLATZ.- On certain iterative methods for solving nonlinear difference equations.- Instability when solving Volterra integral equations of the second kind by multistep methods.- Numerical solution of boundary value problems in Chebyshev series A method of computation and error estimation.- The numerical stability in solution of differential equations.- On the effects of scaling of the peaceman-rachford method.- The effective order of Runge-Kutta methods.- Error bounds for some single step methods.- Approximation of nonlinear operators.- On the numerical treatment of hyperbolic differential equations with constant coefficients, particularly the n-dimensional wave equation.- Monotonic difference schemes for weakly coupled systems of parabolic differential equations.- The numerical solution of evolutionary partial differential equations.- A method for the numerical integration of non-linear ordinary differential equations with greatly different time constants.- Numerical solution of two differential-difference equations of analytic theory of numbers.- Global accuracy and A-stability of one- and two-step integration formulae for stiff ordinary differential equations.- Optimal order multistep methods with an arbitrary number of nonsteppoints.- Alternating direction methods for parabolic equations in two and three space dimensions with mixed derivatives.- On the convergence rates of variational methods.- An A-stable modification of the Adams-Bashforth methods.- Stability, consistency and convergence of variable K-step methods for numerical integration of large systems of ordinary differential equations.- Local-error estimates for variable-step Runge-Kutta methods.- Time-dependent techniques for the solution of viscous, heat conducting, chemically reacting, radiating discontinuous flows.- Attempts to optimize the structure of an ode program.- Round-off error in the numerical solution of second order differential equations.- Stability properties of the extrapolation method.- Implicit methods for implicit differential equations.- Solution of elliptic eigenvalue problems by calculating 'Separable' solutions of a dynamic...
